

# SEEKING ADULTS AGES 18 – 35 WITH A DIAGNOSIS OF SCHIZOPHRENIA OR A RELATED DISORDER

The Yoon Lab is conducting a positron emission tomography (PET) neuroimaging study in individuals who have a recent diagnosis of schizophrenia or a related disorder ages 18-35.

## Participation includes:

- clinical interviews and a positron emission tomography-magnetic resonance imaging (PET-MRI) scan at Stanford.
- Participants will receive up to \$200 for the scan, and \$15 per hour for any non-scanning time.

If interested, please call the Yoon Lab at **(650) 849-0552** or email us at [brain-research@stanford.edu](mailto:brain-research@stanford.edu)

A confidential phone screen will be conducted to determine your initial eligibility.
